Long-Context Behaviour on PG-19 (Mamba-2.8B-hf)
unquantised FP16 / BF16 diverge near 32K; calibrated r_g clipping keeps PPL ≈ 11
FP16 unquantised
BF16 unquantised
FP16 clip-only (calibrated r_g clamp, no quant)
FP16 full INT6 (the §6 recipe)
196.9
11.3
10.5
